Koffi KOUMI, PhD

Independent consultant looking for new challenges

LinkedIn: https://www.linkedin.com/in/koffi-espoir-koumi/
GitHub: https://github.com/Prosper1020
Contact: koffiespoir.koumi@insead.edu |+33 (0)658740429

Citizenship: French
Target locations: France, Germany, Middle East, US
Current location: Ile-de-France, France

PROFILE

Koffi Koumi is an expert in **Manufacturing and Artificial Intelligence**, combining a strong background in mechanical engineering, advanced AI expertise, and significant experience in transformation strategy

Holding a **PhD in Mechanical Engineering**, an **INSEAD MBA**, and a **Machine Learning Engineering certificate**, he has led complex projects at the intersection of AI and operational excellence within major industrial groups (Safran) and leading consulting firms (McKinsey, Capgemini Invent)

He has notably developed **digital twins**, managed **operational efficiency programs**, and led transformation initiatives involving **multiple international stakeholders**

Passionate about mentoring, Koffi created a **dual-degree program** between ENSI (Togo) and INSA Lyon (France) and has supervised over 30 engineering students from INSA Lyon and other institutions during recruitment periods.

SKILLS AND INTERESTS

Smart Manufacturing & Industry 4.0: Operational excellence, industrial performance, applied Machine Learning (prediction, classification, optimization**)**

AI: LLM prompt engineering, AI agents (autonomous agents, multi-agent systems)

MLOps & Cloud: FastAPI, Docker, MLflow, Airflow, Prometheus, AWS

Programming & Data Science: Python, SQL, Matplotlib, Machine Learning algorithms (classification, clustering), Deep Learning

Leadership & Management Skills: Strategy consulting, client relationship management, international project management, cross-cultural team leadership, budget planning (6M EUR), stakeholder management, innovation management, due diligence

Domain Expertise: Mechanical engineering, aerospace, climate tech, research & development, technical innovation, educational program development

Certifications: AI Product Manager, Project Management Professional (PMP), patent holder

Languages: French (native), English (fluent, C1)

Interests: Coaching (e.g., career counseling, communication, influence), Martial Arts, Pilates, Travel

REFERENCES

Available upon request

EDUCATION

SORBONNE UNIVERSITY — Paris, France
Machine Learning Engineering Degree — Jan 2025
- Completed a 6-month bootcamp covering Data Science and MLOps
- Delivered two end-to-end ML projects: Vehicle CO2 emissions prediction, and Weather forecasting system

INSEAD — Fontainebleau, France
Master of Business Administration — 2021 - 2022
- Specialized in Digital Innovation Strategy, Competitive Strategy, and Finance

INSA-LYON — Lyon, France
Doctor of Philosophy in Mechanical Engineering — 2012 - 2015
- Achievements: National best Ph.D. thesis award, 1 patent granted, 4 scientific publications

EXPERIENCE

CAPGEMINI INVENT — Paris, France
Leading AI consulting firm with focus on intelligent industry
AI Strategy Project Manager — 2025 - 2026
- Developed an AI strategy for a defense industry client, including use-case prioritization and roadmap design
- Led supply chain recovery for a major Turkish aerospace player, leveraging Python data mining to identify critical parts impacting deliveries
- Created a performance management cockpit in Power BI and associated operational routines

Advanced Training in AI & Cloud Technologies — Paris, France
Strengthening of the AI expertise — 2024 - 2025
- Participated in an intensive 6-month bootcamp focused on Data Science, MLOps, and Cloud technologies

MCKINSEY & COMPANY — Europe/Africa
Global management consulting firm
Senior Strategy Consultant — 2022 - 2024
- Led an operational efficiency program (diagnostic, design, and implementation of initiatives) resulting in a throughput increase of 15% for an oil and gas client
- Developed and implemented a data-driven delivery unit, optimizing organizational structure and capacity building to drive the digital expansion strategy of a West African ICT Ministry, enabling the connection of 300K households to high-speed internet
- Designed a new organizational structure for an energy company transitioning to a multi-asset portfolio, growing from 2B EUR to 8B EUR in assets
- Delivered to US-based clients a digital transformation plan for Africa, including access to the internet, digital talent development, and digital job creation
- Led diagnostic assessment and designed digital transformation initiatives across agriculture (e-subsidy mobile app), healthcare (telemedicine platform), and education (IT certification programs) for a West African government

E3 CAPITAL — Nairobi, Kenya
Venture Capital (VC) firm managing 175M EUR across two funds
Investment Professional — 2022 - 2022
- Conducted market research and due diligence on 30+ climate tech startups across Africa
- Created detailed investment memos for 5 climate tech startups, including in-depth analysis of South African solar marketplace (500M EUR revenue forecast in year 5) and competitive landscape assessment

SAFRAN AIRCRAFT ENGINES — Paris, France
Aerospace company designing and manufacturing engines for commercial and military aircraft
Senior R&D Project Manager and Data Scientist — 2019 - 2021
- Led numerical modeling project development, managing 4M EUR budget and 60 stakeholders globally
- Developed Machine Learning model (e.g., Kriging, PCA) reducing engine components' weight by 10%, generating 1.5M EUR annual cost savings
- Developed an AI-enhanced digital twin of a bearing test rig integrating sensor data (rotational speed, oil temperature) and predictive analytics (SVM) to simulate performance, reducing test failures by 30%
- Filed patent for new method to predict jet engine component reliability

R&D Project Manager — 2017 - 2019
- Led design and manufacturing of 3M EUR test rig project, coordinating 40 stakeholders across functions (e.g., senior managers, engineers, salespersons)
- Received "Best Research and Technology Stand" award at Safran Aircraft Engines Innovation Day

Design Office Engineer — 2015 - 2017
- Developed solutions for LEAP aircraft engine certification challenges (e.g., seal failures during ETOPS)
